### TS 007:2012

Cylinders and security hardware are now classified in TS 007 according to star rating. Cylinders are able to achieve 1 or 3 stars. Security hardware can attain 2 stars. To attain 3 stars combine an MPx6 cylinder with 2 star rated security hardware and achieve the level of security required to resist known attack methods.

# How to upgrade to a BS Kitemarked cylinder...

## Step 1

Remove your old euro cylinder from your door by simply un-screwing the fixing screw in the lock faceplate when the door is in the open position. Insert and turn the key 30° and remove cylinder from the door. For thumbturn version turn thumbturn and remove cylinder.

## Step 2

Measure the euro cylinder against the ruler on the right. Measure from the outside of the cylinder to the centre of the fixing hole and from the fixing hole to the inside of the cylinder. (Replace the cylinder).

## Step 3

Choose your BS kitemarked cylinder using the correct sizes you have measured previously.

## Step 4

Install your new cylinder by removing the old one as in Step 1. Place the new euro cylinder through the door ensuring the special snap feature is facing the outside of the door.

## Step 5

Secure the euro cylinder into position with the fixing screw provided, taking care not to over-tighten.

**This product will achieve a 3 Star rating when fitted with suitable 2 Star security hardware.**
